At Bella Figura we are passionate about product development. We believe that our dynamic approach to testing the boundaries of style and fashion is one of the keys to helping our clients to remain at the cutting edge of design. This is why we launch at least 75 new lighting designs every year – many of which also incorporate new and exciting materials, colours and finishes that we have developed for you. This mini-catalogue includes all the latest new designs that we have introduced in 2016/2017

We hope this introduction to our extensive lighting range fills you with inspiration and enables you to find the products you are looking for to complete and perfect your forthcoming projects.

To view our entire range, please visit our new website at [www.bella-figura.com](http://www.bella-figura.com) where you will be able to see all our new product launches as they become available every month.

# BELLA FIGURA

Founded in 1982, we are now one of the world's leading decorative lighting companies. We specialise in working with the world's leading interior designers, architects, luxury hotels, property developers, yacht builders and their wealthy private clients.

We have an extensive product range and our designs cover the entire style spectrum from retro to transitional - through to modern and ultra-contemporary. Our products are all made out of the very highest quality materials and they are produced to our design and specification by small family businesses in England and Italy.

In London, we are based at the Chelsea Harbour Design Centre where we have both a trade showroom and our head office. In North America, we have a sales team in Houston, which is responsible for selling either direct to designers or through a small number of showrooms in the major Design Centres. In the rest of the world we supply customers directly from London. We do not use agents or distributors, as our dedicated export sales team can offer a much better and faster service to our overseas customers by dealing with their requirements directly from London.

We are - and would like to remain - one of the world's hidden luxury brands - known only to the most discerning.

The products are all hand-made out of solid, cast Lucite, which is four times clearer than glass and much harder than the more commonly used extruded Perspex.

All the solid metal fittings are available in bronze, gold, nickel or silver in either polished, brushed, distressed or flat finishes. This collection is designed by us in London and made in England.
