BELLA FIGURA

THE WORLD'S MOST BEAUTIFUL LIGHTING

# VEGA

COLLECTION

To be human is to be curious, to push the boundaries of discovery and to want to know more - why are we here? What else is out there? The fascination which started The Vega Collection began with these philosophical notions.

Indeed, this collection is about space and astronomy, but it is about more than just stars and planets; it is a scrapbook of human discovery; the early ideas of space that bewitched our ancestors with its greatness through to the discoveries allowed by modern day technological advances. The same view of the heavens has been observed by human eyes for centuries gone by and although we now understand more, the quietening vastness of space has an unchanged spellbinding power.

Vega is a celebration of all that surrounds us and its hypnotic effect. The collection's creation desires the same impact- bringing this concept indoors and enveloping you in tranquillity and quiet with timeless looks that do not answer to fashion.

To view the full technical information for any of these designs and to view our entire product range, please visit our website at [www.bella-figura.com](http://www.bella-figura.com)

## LYRA

Lyra is the constellation that hosts the star Vega from which our collection gets its name. This chandelier exudes feminine appeal with glass petals fashioned into shapes reminiscent of an ancient lyre, a stringed instrument known in Latin as 'Lyra'.

## HERSCHEL

The Herschel series pays homage to British astronomer, Sir William Herschel who is credited with the discovery of Uranus and its two moons during his many studies of the heavens. This sleek triple pendant is beautifully complemented by its wall light counterpart; the parred back detailing of this series lets the effortless charm of the alabaster shades do all the talking.

# SOL

Humans have long illustrated the sun with a simplified image of a central circle surrounded by lines as rays which frame it. Sol, which takes its name from a sun god, plays on this universally recognised symbol for the Sun with arms that project out from a central point, each ending with a piece of hand-blown flared glass. A simple but joyful piece especially designed to suit those with low ceilings.

## JOVE

This enchanting pendant light is striking on the eye and by Jove, we love it. Jove gains its name from the earlier name for the sovereign deity Jupiter, but it is not only in name that our Jupiter and Jove pendants mirror each other. Both styles are carved from a solid block of alabaster and once the shape is revealed, so too is the intricate network of veins which weave their way through this rock. Alabaster has a smooth appearance which possesses dreamlike qualities when lit due to the varying degrees of translucency in the mineral veins, these natural characteristics deliver a captivating aura and a luxurious warm glow which elevates any space.

# JUPITER

Jupiter represents an authentic connection with the heavenly bodies which are granted the names of ancient deities and symbolize immense power and greatness. This showstopping alabaster pendant glows hypnotically in genuine likeness to the largest planet in our solar system, Jupiter. The options are endless with this series, we offer 2 standard sizes; both a generous open bottomed ceiling light which is truly spectacular and a dainty, miniature globe pendant which is enclosed at the base and can be styled as a single pendant or a cluster for big impact.

## ROSETTA

Plates of embossed and gently bubbled glass create the angular but feminine form of Rosetta. This design has been inspired by the finely tuned Rosetta space probe which is slight and dainty in appearance. Echoing this lithe feat of engineering we created our Rosetta series with a minimum height under 30cm which makes it ideal for low ceilings and with four standard sizes on offer it is highly flexible for both grand and petite spaces.

# AURORA

An ode to the great phenomenon of the night sky, The Northern Lights. The Aurora chandelier is composed of two undulating layers of glass that dance back and forth. Each glass drop is embossed with a swirling pattern highlighted by top mounted LEDs which work to echo the spectral display of Aurora Borealis and create this serene wonder.

## MAGNETAR

Vega's most daring design, the Magnetar ceiling light is the consequence of the discovery of a neutron star of the same name, a star which possess' powerful magnetic fields. The hand moulded glass fins visually represent the pulsating radio bursts emitted by this star. Unlike anything Bella Figura has ever created, this sculptural light conceals an integrated LED light source which emanates an ethereal glow from within.

### MAGNETAR CHANDELIER

## MANTLE

The Mantle series is a celebration of our unique, life bearing planet. The pattern embossed on the Mantle glass is reminiscent of the Earth's crust with rocklike peaks and troughs covering the entire surface. When the integrated LEDs are illuminated the relief print comes to life, highlighting the crests of the craggy surface and throwing the valleys into shadow. This piece brings a touch of theatre with simultaneous quiet intrigue.

## ICE

The Ice chandelier is a reinvention of one of our classics, the Icicle chandelier, which returns, quite literally, with a twist. The glass pendants themselves have been entirely remodelled and now these stalactite-esque droplets are suspended in swirling layers which install a sense of stillness and calm. This chandelier won its place in our Vega collection as its whirling form reminds us of vast rolling galaxies.

# OORT

Astronomers believe that on the edge of our solar system, exists a cloud of icy comets suspended in space. The stillness and serenity of this so called Oort Cloud is honoured by scattered bubbles frozen into glass which glitter as they catch the light in our Oort series.

## COPERNICUS

The origin of the Copernicus series is a theory born of astronomer Nicolaus Copernicus who popularised the idea that the solar system was centred around the Sun not the Earth. The angular arms and spherical details on both the wall light and floor lamp are a playful expression of orbital patterns of the Solar System. The floor lamp is finished with a chic alabaster base that offer this sculptural piece stability with a touch of elegance.

## SUNSHINE

With Bella Figura's characteristic fascination with the Art Deco design movement in mind, the Sunshine wall lights feature a simplistic and geometric impression of sunbeams. When lit, these wall lights throw soft rays of light across the wall and offer a sense of cheerful glamour. This wall light can be completed in a single brushed finish or a combination of two to add extra depth to this majestic style.

## HALLEY

The Halley table lamp is a stylised impression of the most famous comet to grace our skies, Halley's comet. This comet is a rare thing to behold but with a famous reputation for its everlasting presence. To honour 'Halley' honestly was to create a design that would stand the test of time, something that answers to both traditional and modern tastes in one and is in effect timeless.

# OPTIC

Named in reference to the starburst rays of light which crown stars in astrophotography, the birds eye view of our Optic table lamp reveals a superb structure which visually represents these light optics. Viewed from the side the visual concept which inspired this design is totally disguised, but this new dimension offers a totally unique play on the original inspiration and gives a transitional look as the ceramic fins carve out a traditional shape in an ultra-modern style. A triumph of this collection, the Optic table lamp makes a convincing entrance to our collection in three statement looks; Chalk, Jasper and Oil.

## VENUS

Goddess of love and beauty, Venus encompasses femininity and will bring a graceful presence to your interior setting. This refined sculpture is honed from solid Italian glass and embellished with brass fixings. We offer Venus in clear glass for a gentler aura or a satin finish which echoes the glowing presence of her namesake planet, the brightest object in our night sky beyond the Moon, a true object of desire.

# GIBBOUS

There is no celestial body as prominent in the night sky than our humble Moon, its faithful presence is one we consider with wonderment and awe. The Gibbous table lamp is made in tribute to the mysterious spirit of our lunar companion; a generous hand-blown glass body in three shadowy tones paired with a textured and gilded neck which echoes the rocky surface of The Moon. Owed to its flattened form and slim oval lampshade, Gibbous is perfectly suited to console tables and narrower spaces.

# VORTEX

Each Vortex table lamp is a unique art form. No two pieces are exactly the same, owing its sculptural form to a completely handmade, mould-free creation which allows for the unconstrained formation of each lamp's graceful twists and folds. We find ourselves entranced by the frozen fluidity of the Vortex glass, which evokes contemplation with its extraordinary beauty.

# AMPHORA

The Amphora table lamp pays homage to ancient civilisations who bestowed the names of their gods and goddesses on some of the celestial bodies we can witness with the naked eye. The naming of these astronomical discoveries gives them personified characteristics which in turn gave us inspiration for a number of the works included in this collection. An Amphora, chic and strong in silhouette, was often rewarded to victors in contests such as the Panathenaic games, thus the symbol of praise we chose to honour these ancient discoveries.

## CHANDRA

Styled in the same visual language as Hubble, Chandra marks another voyage of discovery—a mission to uncover the universe using X-Rays by the Chandra X-Ray Observatory. The mesmerizing images sent back from the space probe capture far off whirling galaxies, eddying and spiralling whilst seeming completely motionless, a concept we chose to encapsulate with this mini-series of ceramic table lamps.

## HUBBLE

The undulating contours of this table lamp are reminiscent of the 1995 photo "Pillars of Creation" taken by The Hubble Space Telescope, an image that is mesmerizingly out of this world. Statuesque and certain, this design is not one to blend in.

## ASTER

Aster simply aims to encapsulate the raw purity of an asteroid, small and mighty. Done so in a stylistic approach which, replaces rocky textures with whirling folds, this smart and petite character is refined and easy to set down in your interior setting. Aster's smaller size and soft form makes it perfect for bedside areas and tighter spaces.

## STELLAR

We mark the song of the stars with the Stellar table lamp- a symphony of stellar sound waves comprised of the deep bass voices of larger stars and the higher pitches of the smaller stars. But this is a private concert, silent to the human ear and that we must translate through their waves, a pattern visually represented by this silhouette.

## SIGNAL

We may not know what or who is out there in the great expanse of space, but humankind has employed many means to try and uncover these unknowns. This pillar-like table lamp pays tribute to the signals released and listened for by astronomers which cross unfathomable distances bringing Earth tiny pieces of a giant puzzle. This matrix of signals is represented by repeating furrows which pulse sideways in a matched tempo creating a rich texture on the surface of this table lamp, the scores of which fall into contrasting highlights and shadows as the light is turned on.
